Authorization for this examiner's amendment was given in a telephone interview with Shrinath Malur on June 6, 2005.

The application has been amended as follows:

In the abstract:

Amend to abstract to read:

A host computer separates: an I/F portion, to which an address which sends a command is given; a NAS server portion; a cache control portion which processes a device; and an I/F portion which accesses an external storage, and accesses them through an internal network 170 so that the corresponding relation between the I/F and the NAS server and the corresponding relation between the address given to the I/F and the NAS server can be arbitrarily reconfigured according to the processing load or the like.

In the claims:

In claim 1 at the next to last line, delete "and/or" and replace with "and".

14. (Twice amended) A storage system according to claim 12, further comprising:

a plurality of said first controllers,

wherein said plurality of first controllers includes an alternate first controller which inherits the processing executed in said first controller ~~to another of said first controllers~~ in accordance with the instruction of said management unit.

In claim 18 at the next to last line, delete "and/or" and replace with "and".
